Aviation American Gin's Art Deco bottle reflects a simpler time.

This led the gin connoisseurs to request straight shots. One thing that struck those of us who were savoring the gin unmixed was that no spice dominates the way it can in other brands. Instead, it is the very blend itself that stands out. Since we were embarking on a spicy meal, with curries that are also about achieving the right blend of spices, there was a natural sense of continuity around the drink and food. Some guests moved on to wine right away, but others, including yours truly, stuck with the cocktail through the first course of murruku (South Indian tidbits, savory and spicy) and chutneys. The Aviation American Gin went toe to toe with the lime pickle and eggplant relish, and... guess what? They both won!

Ask for Aviation American Gin at your favorite bar or retailer. I'm going to make a gin martini right now. If there's any left. – *by Jeff Thomas, RFT Contributor*
